

TAKE PUSH-TO-TALK TO THE NEXT LEVEL

Perfect for Day to Day, Powerful enough for **Active Shooter**

ALYSSA'S LAW COMPLIANT COLLABORATIVE SCHOOL SAFETY SOLUTION

Push-to-Talk is more than two-way radiocommunication. Group communication and one to one communication is included in TASSTA's solution features for smartphones, PCs or two-way devices. TASSTA Push-To-Talk Solution eliminates the bounds of all your communications. You can have the most efficient way to communicate to your team, with broadband, WiFi and the best carrier, device and application options. Your radio is extended world-wide from your cellphone, send audio, video, panic alarms and messaging from one device. Our Communication tools is an asset to your day to day communications but remains powerful enough for Critical Operations.

Modern communication technologies like TASSTA have a profound impact on Public Safety processes and help to improve the quality and efficiency of communication, and lower the costs.
